ANATOMY OF A HAT

[Shop All Headwear](#)

STRUCTURE

CAP SHAPE

Structured are made with buckram, a stiff material used behind the front panels, which gives the cap a firm shape that retains its form even when not worn.

Unstructured are softer and mold to the wearer's head, creating a lived-in look and feel.

PROFILE

CROWN HEIGHT AND PROFILE

Low-Profile crown has a less steep angle and fits closer to the head for a modern, casual silhouette.

Mid-Profile crown has the perfect balance between depth and slope fitting most head shapes comfortably and offering solid embroidery space.

High-Profile crown has a taller and more squared crown peak often seen in trucker and flat-bill designs, create a bold, structured look with extra room for large or detailed logos.

SEAM

PANEL

PANELS AND SEAMS

Five-Panel does not have a front seam providing uninterrupted decorating space. Very common in flat bill and trucker styles.

Six-Panel has two separate panels. While more panels can add depth and contours, it can also affect logo placement, especially for large art or patches.
